

Stemforte® Plus

Advanced adult stem cell and telomere activity support

WELLNESS • PRODUCT SHEET

It is an advanced all-in-one adult stem cell and telomere support formula that helps delay the aging process by optimizing your cell health and longevity through the rejuvenation of your cells and adult stem cells. Begin to feel young, look better, and improve your overall health at the cellular level.

HOW IT WORKS

Stemforte Plus uses an all-natural proprietary blend that is free of transgenics to harness the power of adult stem cells. It helps to rejuvenate your cells and adult stem cells by strengthening your telomeres and supporting the natural release of adult stem cells. Telomeres protect the cell and allow it to function properly. This formula protects telomere functionality; therefore, reducing the rate of telomere shortening, extending cellular life, thus slowing down the aging process.

KEY BENEFITS

- Supports the natural release of your adult stem cells
- Strengthens and boost your telomere health
- Promotes cellular regeneration
- Fights against free radicals and oxidative stress
- Enhances physical performance
- Supports brain function, cardiovascular health, and immune activity

Advanced adult stem cell and telomere activity support

CAN I TAKE MORE THEN THE DAILY DOSAGE?

3 capsules daily, but cytotoxicity results from the laboratory showed that there was no toxicity for up to 49 capsules.

WHAT ARE THE BENEFITS OF STEMFORTE PLUS?

Stemforte Plus is scientifically proven to increase the circulation of stem cells. An increase of stem cells means that organs can renew and regenerate. Also, proven to increase telomerase activity by 7 folds, which slows down the aging process.

WHAT IS TELOMERASE?

Telomerase restores telomeres, the end caps of chromosomes that protect our DNA, cell functionality, and extend cell life. The amount of telomerase activity declines as we get older and causes our bodies to age. Stemforte Plus activates telomerase enzyme which helps optimize your cell health and longevity through the rejuvenation of your cells and adult stem cells.
